

Ordo socialis

Academic association for the promotion of Christian Social Teaching e.V.

The global world faces people with big challenges. The crisis of finance and economy has made clear that irresponsible and disorderly conduct and actions can generate immense problems. Poverty and richness worldwide are a growing serious problem. The climatic developments are disquieting. The fundamentalistic fight of the religions brings out radical and violent conflicts. The world has been disordered. Parallel thereto is lost value orientation.

Ordo socialis has chosen as task to render its own contribution to the solution of the problems in the framework of our possibilities. Without freedom, democracy, social market economy and social justice the conflicts cannot be resolved. In Germany and in Europe we have long and positive experience with ideas on values and orientation developed by the Catholic Social Teaching. In this area we offer texts by different authors in many languages. Here we use mainly the modern electronic instruments of communication in order to enable as many people as possible and in many countries to have access, free of charge, to these texts. This is our spiritual contribution to the order of the actually complex and global world.

The headquarters of Ordo socialis are in Cologne

We make out receipts for donations and membership fees
